

**SFES PRO** Single Heads and Manifolds are ordered separate from the filters. When ordering a single system, one must order a Single Head Assembly and the desired cartridge. When ordering a Triple System, the order will consist of a Triple Manifold and (3) of the same desired filters. On standard twin, triple, and quad manifolds, the same cartridges must be used as these systems are run in a parallel configuration.

Combo Systems are ordered as complete systems that contains the manifold and filters.

Single Units have a choice of 3/8" FPT, 3/8" MPT, and 3/8" QD connectors.

Twin systems come with the standard 1/2" MPT fittings unless otherwise specified.

Pressure Gauge/Drain Valve Assembly is also ordered separately if desired.
